

## CL-056型称重传感器

## Double Shear Beam Weight Sensor

### 1.工作原理

CY - YB - 410型称重传感器采用金属应变原理，将重量值转换成电信号。

### 2.特点

精度高、温度特性好，稳定性好，单台支撑面积可达400 × 400。

### 3.应用范围：

适用于料斗称、仓储称、地上衡等。

### 1.Working principle: 。

CL-056 weight sensor adopts metal strain principle, the weight value is transformed into electrical signals

### 2. Characteristic:

High precision and good temperature characteristic, good stability and single supporting area of up to 400 x 400

### 3. Application:

Suitable for hopper scale, storage weighting, ground scale, etc
