

温度变送器**Temperature Transmitter**

量程调整与零点调整相互独立
工作环境温度范围：-40~+125℃
测量精度：±0.1%、±0.5%
输出与被测温度呈线性
抗干扰，带反向保护系统
耐腐蚀、抗震性好、可靠性高

Range adjustment and zero adjustment are independent
Working temperature: -40~+125℃
Accuracy: ±0.1%、±0.5%
Output and the measured temperature is linear
Anti-interference, with reverse protection system
Corrosion resistance, good shock resistance, high reliability
